

IN THE CLAIMS:

Claims 1-60 (Cancelled).

61. (Currently Amended) An endovascular sleeve for delivering a pair of guidewires to a bifurcated body passageway of a patient, the sleeve comprising a first tubular passageway and a second tubular passageway fixed with respect to one another, the first tubular passageway comprising a first distal end and a first proximal end, the second tubular passageway comprising a second distal end and a second proximal end, the first distal end extending distally beyond the second distal end to define a junction which abuts against a crotch in the bifurcated body passageway, the second tubular passageway having a length such that the second proximal end extends proximally from the patient;

 said guidewire being disposed in the first tubular passageway and the second tubular passageway is free of any guidewire.

62. (Currently Amended) The endovascular sleeve defined in claim 56 61, further comprising a radioopaque marker disposed thereon.

63. (Currently Amended) The endovascular sleeve defined in claim 57 62, wherein the radioopaque marker is disposed at the junction.

64. (Currently Amended) The endovascular sleeve defined in claim 56 61,
wherein the first passageway has a substantially circular cross-section.

65. (Currently Amended) The endovascular sleeve defined in claim 56 61,
wherein the second passageway has a substantially circular cross-section.

66. (Currently Amended) The endovascular sleeve defined in claim 56 61,
wherein both the first passageway and the second passageway have a substantially
circular cross-section.

67. (Currently Amended) The endovascular sleeve defined in claim 56 61,
wherein the first distal end extends beyond the second distal end by a margin of at least
about 0.3 cm.

C 1
Contd 68. (Currently Amended) The endovascular sleeve defined in claim 56 61,
wherein the fist distal end extends beyond the second distal end by a margin in the
range of from about 0.3 to about 3 cm.

69. (Currently Amended) The endovascular sleeve defined in claim 56 61,
wherein the first distal end extends beyond the second distal end by a margin in the
range of from about 0.5 to about 2 cm.

70. (Currently Amended) The endovascular sleeve defined in claim 56 61,
wherein the first distal end is chamfered.

71. (Currently Amended) The endovascular sleeve defined in claim 56 61, wherein the second distal end is chamfered.

72. (Currently Amended) The endovascular sleeve defined in claim 56 61, wherein both the first distal end and the second distal end are chamfered.

73. (Currently Amended) A bifurcated stent delivery system for delivery of an expandible prosthesis to a bifurcated body passageway of a patient, the system comprising:

a catheter;

guidewire; and

C1
Cent an endovascular sleeve comprising a first tubular passageway and a second tubular passageway fixed with respect to one another, the first tubular passageway comprising a first distal end and a first proximal end, the second tubular passageway comprising a second distal end and a second proximal end, the first distal end extending distally beyond than the second distal end to define a junction which abuts against a crotch in the bifurcated body passageway, the second tubular passageway having a length such that the second proximal end extends proximally from the patient;

said guidewire being disposed in the first tubular passageway and the second tubular passageway is free of any guidewire.

74. (Currently Amended) The kit defined in claim 68 73, wherein the endovascular sleeve further comprises a radioopaque marker disposed thereon.

75. (Currently Amended) The kit defined in claim 69 74, wherein the radioopaque marker is disposed at the junction.

76. (Currently Amended) The kit defined in claim 68 73, wherein the first passageway has a substantially circular cross-section.

77. (Currently Amended) The kit defined in claim 68 73, wherein the second passageway has a substantially circular cross-section.

78. (Currently Amended) The kit defined in claim 68 73, wherein both the first passageway and the second passageway have a substantially circular cross-section.

Cont
79. (Currently Amended) The kit defined in claim 68 73, wherein the first distal end is at least about 0.3 cm is longer than the second distal end.

80. (Currently Amended) The kit defined in claim 68 73, wherein the first distal end is longer than the second distal end by a margin in the range of from about 0.3 to about 3 cm.

81. (Currently Amended) The kit defined in claim 68 73, wherein the first distal end is longer than the second distal end by a margin in the range of from about 0.5 to about 2 cm.

82. (Currently Amended) The kit defined in claim 68 73, wherein the first distal end is chamfered.

83. (Currently Amended) The kit defined in claim 68 73, wherein the second distal end is chamfered.

84. (Currently Amended) The kit defined in claim 68 73, wherein both the first distal end and the second distal end are chamfered.

85. (Currently Amended) The kit defined in claim 68 73, wherein the catheter comprises at least one expandable member.

C1
Contd
86. (Currently Amended) The kit defined in claim 80 85, wherein the expandable member is disposed adjacent a distal end of the catheter.

87. (Currently Amended) The kit defined in claim 80 85, wherein the catheter comprises two expandable members.

88. (Currently Amended) The kit defined in claim 80 85, wherein the catheter comprises a substantially Y-shaped expandable member.

89. (Currently Amended) The kit defined in claim 80 85, wherein the expandable member is a balloon.

90. (Currently Amended) The kit defined in claim 80 85, further comprising a bifurcated stent disposed on the expandable member.

91. (Currently Amended) The kit defined in claim 85 90, wherein the bifurcated stent is mounted on the expandable member.

Claims 92-115 (Withdrawn).

116. (Currently Amended) The endovascular sleeve defined in claim 56 61, wherein the second proximal end extends beyond the first proximal end.

117. (Currently Amended) The endovascular sleeve defined in claim 111 116,
wherein the first tubular passageway has a length such that the first proximal end does
not emanate from a subject and the second tubular passageway has a length such that
the second proximal emanates from the subject.

118. (Currently Amended) The endovascular sleeve defined in claim 56 61,
wherein the second proximal end the first proximal end and the second proximal end
are substantially juxtaposed.

119. (Currently Amended) The endovascular sleeve defined in claim 113 118,
wherein the first tubular passageway and the second tubular passageway have a length
such that the first proximal end and the second proximal end each emanate from a
subject.

120. (Currently Amended) The endovascular sleeve defined in claim 56 61,
wherein the first tubular passageway and the second tubular passageway are each
constructed of a material having sufficient integrity to be navigated through tortuous
and body passageways.
